Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 26-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Swapp ('050).

Swapp teaches the following claimed limitations as cited below:

Claim 26: (New) A method of making electrical connections between at least one first electronic component and a second electronic component, comprising:

fabricating a plurality of spring contact elements (13/19) directly upon said at least one first electronic component, said spring contact elements each having a tip end (13/19) which is spaced above a surface of the at least one first electronic component and at least one of said spring contact elements being a different size than the other spring contact elements(13/19); and bringing the at least one first electronic component together with a second electronic component so that the tip ends of the spring contact elements are in electrical contact with corresponding terminals on the second electronic component (Fig.4).

Art Unit: 2813

Claim 27: (New) The method according to claim 26, wherein: the at least one first electronic component is at least one active semiconductor device; and the second electronic component is a test substrate(Col.6, lines: 15-25); further comprising:
powering up the active semiconductor device while maintaining the tip ends of the spring contacts in electrical contact with the terminals of the second electronic component (inherent-power application is necessary for the spring contacts to electrically connect).

Conclusion
